## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In regard to claim 1, the prior art does not disclose a video processing device with the combination of limitations claimed, specifically the limitations of:

second generating means for generating a second brightness transfer gain signal; and  
third generation means for generating a third brightness transfer gain signal as a function of the first brightness transfer gain signal and the second brightness transfer gain signal,  
wherein the two luminance knee processing operations are performed as a function of the third brightness transfer gain signal.

In regard to claim 6, the prior art does not disclose a video processing method with the combination of limitations claimed, specifically the limitations of:

generating a second brightness transfer gain signal; and  
generating a third brightness transfer gain signal as a function of the first brightness transfer gain signal and the second brightness transfer gain signal,  
whereby said method is operable to compression process selected pixel by performing, for each such selected pixel, the two luminance knee processing operations, as a function of the third brightness transfer gain signal, followed by a saturation knee processing operation.

The dependent claims of claims 1 and 6 are allowable due to their dependency on the independent claims.

Art Unit: 2615

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
